

R-Tech

The “Powers of Detection” article was published in the September 2010 issue of the R-Tech Newsletter. The R-Tech Newsletter is part of the Department of Homeland Security Science and Technology Directorate’s First Responder Technologies (R-Tech) outreach program to Federal, tribal, state, and local first responders. R-Tech’s mission is to protect America against terrorism, disasters, and all other hazards by providing first responder solutions for high priority capability gaps due to technology and assisting first responders through rapid prototyping, technical assistance and information sharing.

The R-Tech Newsletter discusses technologies of interest to first responders that have received funding, in whole or in part, from the government. Mention of these technologies should not be construed as an endorsement of either the technology, or the entity producing it, by the Federal government.

The latest issue of the newsletter is posted at www.firstresponder.gov/Pages/NewsLetter.aspx. This link also provides access to past issues of the newsletter, as well as the opportunity to subscribe to future issues.

For more information, please visit R-Tech’s Website, www.FirstResponder.gov.
